70FT HIAB CRANE & GRAB BOAT

This 70ft powered self loading/self discharging crane boat is fitted with four vertical and two horizontal hydraulic stabiliser legs. It also has two removable water tight skips for containing dredgings or concrete.

This one vessel can do the job of a dredger, pusher tug and hopper, being able load itself, remove or deliver materials to site and then discharge itself. Due to its large carrying capacity it is ideally suited to carry out spot dredging, delivering materials to sites with poor access, towpath works and piling. The hiab can fitted with a range of attachments from Hook, Clamshell bucket, piling hammer and post hole borer.

KEY INFO

- LENGTH 70FT (21.3M)
- BEAM 7FT (2.1M)
- CARRYING CAPACITY UP TO 15 TONNE
- MOBILISATION – VIA CRANE AND LORRY
- WELFARE
- CAPABLE OF CARRYING LIQUID MATERIAL

70FT HIAB CRANE & GRAB BOAT

CONTINUED

Our **VERSATILE** fleet can be used across the country to facilitate all types of inland waterways whether it be for hire, marine contracting or operated plant.

We have a **PASSIONATE** team who strive for excellence; in the quality of workboats sent on hire, operating the boats; or delivering a civil engineering project.

Our team of **EXPERT** engineers are able to provide 24hr response time to problems.

We pride ourselves on having a **PRAGMATIC** approach to projects and can advise clients on the best way forward for hires or contracts based on cost, time & outcome needed.

Our use of **INNOVATION** leads to delivery of your project; with potential to specially adapt pieces of kit, fabricated to suit your needs.
