WIDE BEAM DIGGER PONTOON - UP TO 6 TONNE

Wide beam digger pontoons capable of carrying a machine up to 6 tonne. Ideal for piling, dredging and machine transportation.

It is fitted with a small hydraulic power pack which operates the four stability jack legs which makes it an extremely stable working platform. It can turn through 90 to allow the machine to be tracked on & off. It's modular design allows it to be easily transported via hiab lorry.
