SHALLOW DRAFT PUSHER TUGS

If depth is a consideration shallow drafted tugs would be ideal; although small, they still have the pushing power for moving large hoppers. Their adjustable height propellor mean they are suited to congested areas where rubbish can become wrapped round your blade on deeper drafted vessels. These boats can be hired with or without an operator and are transported via hiab or the waterway network.

KEY INFO

- LENGTH - 20FT (6.1M)
- BEAM - 6FT 10" (1.9M)
- HOLD LENGTH N/A
- DRAFT - 24" EMPTY (600MM)
- CARRYING CAPACITY N/A
- MOBILISATION - VIA HIAB LORRY
