## VIBRO HAMMERS

Dawson Construction  
Excavator Mounted  
Vibrators (EMVs) work  
in place of an excavator  
bucket to both drive  
and extract piles. These  
vibratory hammers form  
a productive and cost  
effective piling rig that  
works around a standard  
excavator.

### KEY INFO

- COMPACT, ROBUST AND RELIABLE - NO ELECTRICS
- SIMPLE AND FAST ATTACHMENT TO THE EXCAVATOR
- MINIMAL HEIGHT TO MAXIMISE THE PILE LENGTH
- SLIM DESIGN TO DRIVE SINGLE SHEET PILES
- HIGH POWER TO WEIGHT RATIO
- UNIVERSAL JOINT SUSPENSION FOR EASY ALIGNMENT OF PILES
- EXTREMELY LOW VIBRATION TRANSMITTED TO THE EXCAVATOR
- AUTOMATIC HYDRAULIC CLAMP OPERATION
- FLEXIBILITY IN APPLICATION
- FLOW REGULATOR PREVENTS EXCESSIVE OIL SUPPLY TO VIBRATOR
- HEAVY SADDLES AVAILABLE FOR CRANE SUSPENDED MODELS
