DIGGER HOPPERS

Specialist machine transporter and operating platform pontoon. This vessel is capable of transporting up to a 2.5 tonne machine to awkward access sites, where the machine can either be tracked off the hopper to work or with the stability legs down it can operate from the hopper itself, the machine can be tracked up and down the vessel to work with no danger of the boat capsizing. The floors can easily be taken out to enable the vessel to be used as a standard hopper for carrying materials etc.
