POWERED EXAVATOR PONTOON

Due to the success of the unpowered mini digger pontoons we have designed and built a powered version.

With all the advantages of the mini digger pontoon, including being able to track a mini digger on/off the towpath and down into the bottom of the boat for transport, but being self-powered makes this the ideal package to carry out piling, nicospan or dredging works. Being only 40ft and weighing 10 tonne we can still deliver this craft by hiab lorry, therefore reducing mobilisation costs and timescales.

KEY INFO

- LENGTH – 40FT (12.2M)
- DRAFT – 28” (700 MM) LOADED
- SELF-PROPELLED
- SEPARATE LOCKABLE STORAGE AREA
- WEIGHT – 10 TONNE FOR EASE OF TRANSPORTING BY HIAB
- WIDTH – 6FT 8” (2.1M)
- FOUR HYDRAULIC SPUD LEGS TO PROVIDE STABLE PLATFORM
- MAXIMUM SIZE OF MACHINE TO BE USED ON PLATFORM 2.5TONNE
