Wide Beam Crane Boat

Our new Wide Beam Crane Boat is road transportable for ease, fitted with a pipe for third services such as clamshells, post drivers and piling hammers. The 4 hydraulic stabiliser legs complete with large foot plates sustain reduced ground pressure and the wide positioning of the crane is great for self loading and self discharge.

The 7m internal load space and sealed internal tank allows for flexible usage - allowing it to carry liquid materials including dredgings and concrete as well as stone etc. The crane has a capacity for 3.5tonnes at a 4.5m reach, and 870kg at 14m reach. See below for more details on crane reach and capacity.

- ✓ LENGTH 45FT (13.7M) X WIDTH 9'8" (3M)
- ✓ CARRYING CAPACITY 25T
- ✓ CRANE MOUNTED AT FRONT - TO GIVE 370 DEGREE WORKING SPACE
- ✓ CRANE FULLY REMOTE CONTROLLED
- ✓ UNPOWERED
- ✓ ROAD TRANSPORTABLE
